Skills

React.js, Redux, JavaScript, Typescript, HTML5, CSS3, Node.js, Express.js, SQL, PostgreSQL, Python, Docker, Heroku, Github, Flask, SQLite3

Projects

Bizzybee | React.js, Redux, Typescript, CSS3, Python, PostgreSQL, Docker, Flask, HTML   [Live Site](#) | [GitHub](#)
- Collaborated with four other group members to develop a clone of Yelp by mimicking its sleek UI and search functionality, utilizing Flask / Python for the backend API and React, Redux, and TypeScript for the frontend.
- Engineered a PostgreSQL database complete with models, migrations, and seeders to provide the same functionality as Yelp by allowing things such as creating your businesses and reviews
- Deployed the application by building and uploading a Docker image to Render to have a finer degree of control over the deployment process.

OneMusic | JavaScript, React / Redux, Express, Typescript, PostgreSQL, CSS3, Docker, HTML   [Live Site](#) | [GitHub](#)
- Launched an application called OneMusic that allows users to seamlessly transfer their music playlists between music streaming platforms, incorporating both the YouTube API and the Spotify API.
- Utilized React, Redux, and TypeScript for the frontend to manage the state of my application itself and the state of the data retrieved and sent to both the YouTube and Spotify API.
- Designed the backend using Express so that TypeScript could be used to maintain datatypes across both the backend and frontend..
- PostgreSQL was used to complete the backend and store user data, and the entire application was built into a Docker image and deployed by Render instead of the standard Render deployment.

Experience

Shift-Supervisor, Starbucks | Apr 2024 - Present
- Led 10+ baristas in a high-volume store, coordinated peak-period tasks, onboarded/coached new hires, and improved service via shift meetings..
- Performed senior duties, including ordering trucks, counting inventory, following up on and filing incident reports, and managing the store's finances to make sure the store stayed operating at peak efficiency.

Shift-Lead, Jersey Mike's Subs | Sept 2022 - Apr 2024
- Provided fast, friendly service to the customers, made sandwiches according to Jersey Mike's specifications and high-quality standards, and kept the restaurant clean and sanitary at all times.
- Communicated effectively with team members and managers to coordinate work schedules, train new-hires, and resolve any conflicts that arose, all while selling an average of $5000 worth of product per day.

Education

App Academy | July 2024 - July 2025 | Remote - Immersive full-stack software and web development course

Certified Scrum Developer | Certificate | Mar 2024 | Remote - Upskilled in Agile methodologies

Brainstation | Jan 2023 - Sept 2023 | Remote - Immersive full-stack software and web development course

Codesmith CS Prep | June 2022 | Remote - A basics course on computer science and problem-solving.

Awards

Lush Industry Project Winner [LinkedIn](#)
Worked on a team of software engineers, UX designers, and data analysts to win a contest sponsored by Lush Cosmetics to code an MVP for a redefined version of the POS.
